

GALENA 7.2 and KeyServer Client Installation

The KeyServer Client software must be installed and operating to use **GALENA**.

KeyServer Client (K2Client)

Please contact your Service Manager for installation instructions and the latest KeyClient/Access version.

GALENA 7.2

The **GALENA** installation package is available for download via the link on the TIPS Software Downloads page at: <https://www.osmre.gov/programs/technical-innovation-and-professional-services/services/galena>

Select the provided link to download the **GALENA** 7.2 installer package from the **GALENA** Software website.

NOTE: A Username and Password are required to download the **GALENA** installer package – contact Ron Miles ((412) 937-2834) at OSMRE in Pittsburgh for access details.

Run the downloaded installer (GALENA72-KSSetup.exe) and allow it to install **GALENA** 7.2 on your PC. You may need Administrative rights to install **GALENA**. *The **GALENA** 7.2 installer can also be used to upgrade an existing **GALENA** 7.1/6.1 installation.*

GALENA should now be ready to use by selecting the **GALENA** 7.2 desktop icon, or by selecting the **GALENA** 7.2 option from within the **GALENA** menu group (under All Programs) on your PC's Start menu.

Context-sensitive Help is available while using **GALENA** by pressing <F1> at any time.
